

## Cool Presentation Luminous Frame System *Style*

### LED meets cool aluminium

The newly developed luminous frame system *Style* unites the cool elegance of high-quality aluminium combined with the newest LED technology. The illuminated surface produces no vignette and is absolutely consistently illuminated, without the typical light reduction in the centre of the image.

Thin-line, secure operation: The drastically reduced frame thickness compared to other conventional products is only 20 mm and leaves nothing to be desired. Besides that, there are no cut backs in functionality: Changing the image takes no time at all.

Your original image is exactly matched with the transmitted light and printed using an 8-colour screen system. This means a one-stop production. The protective transparent reflection-free foil protects your image against everyday wear and tear. Individual sizes are also available.

### Application examples

- Sales promotion at point-of-sale
- Trade fairs and events
- Hotels & catering
- Casinos, gyms and cinemas
- Train stations, airports
- Shopping centres, shopping malls
- Art & lifestyle
- ... your application?

Invisible power-supply due to insulated steel suspension cables

## Made-to-measure

Benefit from our individual *Style* made-to-measure frame. We deliver the illuminated frames not only in the most popular standard sizes, but also manufacture individual sizes up to 3.00 m x 1.5 m, and in the shortest time. We also produce up from 1 single item.

Standard sizes:

- DIN A3
- DIN A2
- DIN A1
- DIN A0

## Image print

Print your images with us with our 8-colour screen system! You will receive your print on long-lasting backlit foil for optimum image quality and brightness.

Ceiling suspension available as model V (vertical) and H (horizontal)

## Technical specifications

- Anodised, E6 EV1, depth 22 mm
- Frame width only 20 mm
- Hidden power-supply possible
- Quick and easy image changing using a simple clip mechanism
- Adapted for inside use
- Fittings available for walls and ceiling suspensions

Safe and easy: opening and closing the frame

## Features

- Elegant design due to low and thin profile
- Consistent, high luminosity
- Neutral white background without colour fluctuation
- Invisible power-supply via suspension cables
- Vertical or horizontal construction (ceiling suspension)
- Wall-mounted version mountable in every possible angle
- Frame printable on request
- Complete with fitting-set
- Made in Germany with the German guarantee
